Extension Request

Attachment to:
Request for Extension of Time

Application: **35-12099 (E4803)**

Filed by: **Powder Mountain Water & Sewer Improvement District**

This exchange application is based on a contract with the Weber Basin Water Conservancy District and provides for the water supply for the Powder Mountain Water & Sewer Improvement District (District) which includes the ski resort and related development, condominiums and homes served by the District. This exchange application contemplates three springs and a well which are the critical water supply for the District.

Construction completed to date:

Presently the District is using the main spring contemplated by this exchange application. The other two springs have been developed and the well has been constructed and is used from time to time within the system. Additional expense will be required to upgrade the other two springs and the well before being used permanently in the system. Routine maintenance on the springs has and will continue to occur. The District has been working with the Division of Drinking Water on a Preliminary Evaluation Report for additional well sites and an additional spring.

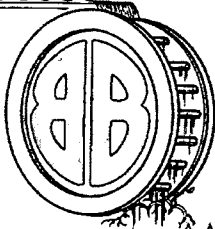

A major development is in the early construction phases within the District. Under another exchange application two deep test wells at significant expense have been drilled within the past few months.

Work completed since the last extension:

Not applicable - This is the first extension request since approval of this application.

Reasons why the project has not been completed:

The springs and well contemplated by this exchange application have been developed and constructed. However, full utilization of water under this exchange application will occur as development occurs within the District. As a public water supplier, the District is developing, using and holding this water right to meet the reasonable future requirements of the public pursuant to §73-3-12. Hence the District requests that this exchange application be extended for five additional years.

Re: Extension Requests on E4803 (35-12099) and a33723 (35-4514) Filed by the Powder Mountain Water & Sewer Improvement District

Ross:

Attached hereto are an extension request on an exchange application and an extension request on a change application for the Powder Mountain Water & Sewer Improvement District. The District has just recently undergone a wholesale change in board members and management and the exchange application lapsed. Therefore, we request that with this extension you re-instate the exchange application. With the change in management the 60-day notice was not recognized and processed. Therefore, I also request that you add me at the above address to the notices for the District's water rights E407, E1273, E4803 and a33723 (35-4514).

E407

Should have any questions regarding these extensions, please call me.

Sincerely,

Don A. Barnett, P.E., P.G.
